

Magnotherapy for you and your horse? **Emily Wilton BSc(hons) Eq Sci, Dip. MCAM**

GOOD NEWS: Emily is now able to offer Magnotherapy for you, your horse, dog or cat, but what is Magnotherapy?

Magnotherapy is the application of a magnetic field to living tissue. It has been used to help relieve aches and pains and to accelerate healing for hundreds of years and has gained rapid popularity in recent times for three reasons.

- The quest for natural remedies as an alternative to conventional medication
- The advancement and better understanding of magnet technology
- The public awareness created by the incredible success of Bioflow®.

Whereas modern drugs are targeted at various medical conditions Magnotherapy supports the maintenance of the body's basic essentials- its communication and transportation systems.

Magnotherapy increases circulation, therefore increasing oxygen carriage to the tissues, which will speed up repair and removal of toxins the products of inflammation. It can be used to warm-up or loosen muscles before and after exercise, and is also helpful in older horses to combat any tendency to stiffen up.

Magnetic rugs can be particularly helpful when travelling to a competition to relax the muscles and increase blood flow, and in between therapy treatments, to encourage healing.

Boots and wraps can help with tendon injuries, reducing swelling in horses with a tendency to filled legs or stiffness and arthritic joints.

Collars and bracelets are used on people and dogs because it acts on the blood circulation it will work for the whole body; magnets can be placed in a specific area for a faster effect.

Magnotherapy helps in two primary areas:

- It helps the electrolytes pass information by maintaining the electrical conductivity of living cells.
- It encourages processes that produce ions containing oxygen with strong oxidising or reducing capabilities that help to maintain the pH balance.

Most of the conditions that Magnotherapy has helped are a direct result of the above as they are all dependent on a healthy pH balance.

Emily uses Bioflow® products, which are the result of extensive development. Bioflow® are not just another magnet of the type used by many products appearing on the market. They have a patented magnetic module known as Central Reverse Polarity (CRP) designed specifically to help move electrons. All matter that moves through the CRP field is subjected to the additional 'kick' of the three opposed directional forces. This action provides a better environment for molecular change by

the alignment of electrons. In other words, molecules that exit a CRP field are more efficient.

Here are some of the conditions that Bioflow® Animal Healthcare products have reported to provided relief:

Achilles tendon	Fractures	Rheumatism
Angina	Haematomas/ bruising	Ring Bone
Arthritis	Hock Injuries	Sinus problems
Asthma	Immobility/Stiffness	Scar Tissue
Back pain	Joint Arthrosis	Skin sores/ ulcers
Blood Pressure	Laminitis	Spinal damage
Bone Spavin	Ligament strains/ sprains	Spondylitis
Bursitis	Muscle strains	Swollen joints
Chondritis	Oedema	Tendonitis
Congenital Hip dyspalsia	Osteochondrosis	Thrombosis
Cramp Cuts	Osteoarthritis	Would healing
Diabetes	Osteoporosis	
Eczema	Partial paralysis	
Epilepsy	Poor circulation	

If you would like a free visit to view and try Bioflow® Magnotherapy for you, your horse or dog or would like any information on any of the other therapies Emily offers please visit her website www.animaltherapist.co.uk or ring 07803294446 to book an appointment.

Bioflow® products carry a **Lifetime Guarantee** on their magnetic properties.

They are guaranteed against faulty parts and workmanship for a period of one year from the date of purchase (subject to normal conditions of use).

If you are not satisfied with the performance, simply return the product within 90 days of purchase for a refund (15% of the original price with be deducted for handling etc)

CUSTOMER LOYALTY SCHEME – Renew or replace your **BIOFLOW®** at any time and receive a credit of 50% of the original price towards the new one.
